Mum and Baby

Mum and Baby

Let's talk about mum first. Being pregnant can often have downsides, with morning sickness, tiredness, swollen ankles and a growing bump, not to mention the possibility of haemorrhoids and back ache.

For the purpose of the Cosmetics market, we will focus on stretch marks and pain reduction for haemorrhoids. Stretch marks are caused by the rapid stretching of the skin. They are linear scars which affect a thin layer of skin and can be alleviated pre- and post-birth by keeping the skin moist and supple. This can be achieved by the application of creams/ oils designed to keep the skin firm, strong and supple (along with the help of active ingredients that provide moisturisation and help repair the collagen-elastin network).

Now let's talk about babies. Their skin is very different to adult skin and as such, needs special care. Mild and gentle ingredients are essential for this market sector. Products treat and prevent nappy rash, cradle cap (infantile Seborrheic dermatitis), as well as calming oils for baby massage applications.
