

FRAME FORMULATION

TOTAROL™ ANTI-WRINKLE CREAM

The combination of Totarol™ providing anti-inflammatory, microbiome balancing, anti-oxidation and anti-aging properties with SepiControl A5, which is an Aminovector™ solution which combines glycine and cinnamon bark extract which has astringent properties. This Anti-Acne Cream with non-comedogenic lipids restores the balance to acne-prone oily skin by reducing the number of blackheads and the sebum level.

Disclaimer: The above frame formulation is only a proposed suggestion on usage of Totarol™ for topical skincare use. The end user must determine the suitability of use, stability and performance of the Frame Formulation and accepts any and all liability that use of this Frame Formulation may confer.

NAME	%WT
PHASE A	
Eumulium Mellifera	4.00
Brassica alcohols	2.00
Neossance Squalane	3.00
Argan Oil	2.00
Hemp Seed Oil	2.00
Safflower Seed Oil	5.00
Tocopherol acetate	0.50
<i>Heat Phase A to 70°C under medium stirring</i>	
PHASE B	
Water	To 100%
Glycerine	3.00
Xanthan Gum (and) sclerotium gum	0.30
Allantoin	0.20
Niacinamide	0.50
Allantoin	0.10
<i>Heat Phase A to 70°C under medium stirring, then apply high shear until a rich glossy emulsion has formed.</i>	
<i>Cool with stirring to 35°C</i>	
PHASE C	
SepiControl A5	4.00
<i>Add Phase C to the batch with constant stirring</i>	
PHASE D	
Triethanolamine	0.13
<i>Mix until homogenous and pH = 6.0 – 6.5</i>	
PHASE E	
Totarol™ T 9	2.00
Preservative	QS
<i>Add Phase D one ingredient at a time with constant stirring. Stir until Room temperature</i>
