

ARGAN BUTTER®

Argan Butter® is a soft, creamy emollient paste made from naturally derived octyl dodecanol from coconut oil, NF grade beeswax, and cold pressed argan seed oil. This results in a natural product, that melts at body temperature, has superb barrier qualities, and excellent emolliency. Argan Butter® has been specifically designed for skin and sun care applications, having outstanding skin feel with good play time, without the greasiness of conventional butters, plus combining the benefits and functional attributes of argan oil. This product adds new marketing dimensions for all segments of personal care applications.

TYPICAL PROPERTIES

Appearance at 25 °C:	Off-white paste
Odour:	Typical mild fatty
Colour (Gardner):	5 Max
Acid Value (mg KOH/g):	5 Max
Melt Point:	40 to 50 °C

GLOBAL DESIGNATIONS

Adopted INCI Name:

Octyl Dodecanol, Beeswax, Argania Spinosa Kernel Oil.
