

# HydroSal™ Color Seal

Technology to seal the color makeup onto the skin for 12 hours.

The polymeric structure of HydroSal Color Seal™ allows for a low texture that, once applied on the skin with the color, forms a thin layer of water and oil durability preventing color from smudging and fading. It's a product especially suitable for sensitive area around your eyes. Can be formulated to liquid and gel forms.

HS Color Seal allows for long-wearing, perfect for creating dramatic, attention-demanding eyes or lips for executing any look you desire for longer display.
