

LAVENDER BUTTER®

Lavender Butter® is a soft, creamy emollient paste made from naturally derived octyl dodecanol from coconut oil, NF grade beeswax, and cold pressed lavender oil. This results in a natural product, that melts at body temperature, has superb barrier qualities, and excellent emolliency. Lavender Butter® has been specifically designed for skin and sun care applications, having outstanding skin feel with good play time, without the greasiness of conventional butters, plus combining the benefits and functional attributes of lavender oil. This product adds new marketing dimensions for all segments of personal care applications.

TYPICAL PROPERTIES

Appearance at 25 °C:	Yellow paste
Odour:	Typical mild fatty
Colour (Gardner):	5 Max
Acid Value (mg KOH/g):	5 Max
Melt Point:	40 to 50 °C

GLOBAL DESIGNATIONS

Adopted INCI Name:	Octyl dodecanol, Beeswax, Lavandula Angustifolia (Lavender) Oil.
CAS Reg. No.:	5333-42-6, 8012-89-3, 8000-28-0
