

BAMBOO FIBRES POWDER

Soft Scrub Agent

Ref.: SA014

► DESCRIPTION

Ennagram's BAMBOO FIBRES POWDER is a micronised and standardized powder of Bamboo (*Bambusa vulgaris*) fibres. It is a natural oriented and very soft scrub agent with practical function to create smooth and fresh skin. It is compatible with all cosmetic formulations.

► COSMETIC USE

The BAMBOO FIBRES POWDER is suggested as a very soft scrub agent, especially for delicate and sensitive skin types. It can be incorporated in liquid, gel, cake and bar cleansing or massaging preparations.

The BAMBOO FIBRES POWDER, when incorporated in a cleansing or massaging product, has the property to softly stimulate the micro-blood circulation by its mechanical and physical action on the skin. It also gently removes the old horny layer, wastes, dusts from the skin, and accelerates the skin metabolism. Its controlled particle size around 60 µm ensures consistent performance.

► SPECIFICATIONS

Appearance	Powder
Colour	White
Odour	Neutral
Total fibres	> 96 %
Minerals	< 1 %
Moisture	< 8 %
pH (10% solution)	5.0 – 7.5
Heavy metals	< 10 ppm
Density	220 ± 20
Water retention	350 – 575 %
Oil retention	235 - 240 %
Particle size	65 % ≤ 32 µm; 95 % ≤ 100 µm; 100 % ≤ 400 µm
Total germs	< 5000 cfu/g
Yeasts and moulds	< 200 cfu/g
Pathogens	Absence

► SUGGESTED DOSAGE

Scrubbing preparations for the face: 5 - 10 %
 Scrubbing preparations for the body: 7 - 10 %

► PRODUCT IDENTIFICATION
