

Environmentally-friendly microspheres for unique visual effect.

SalColors™ (SCO)

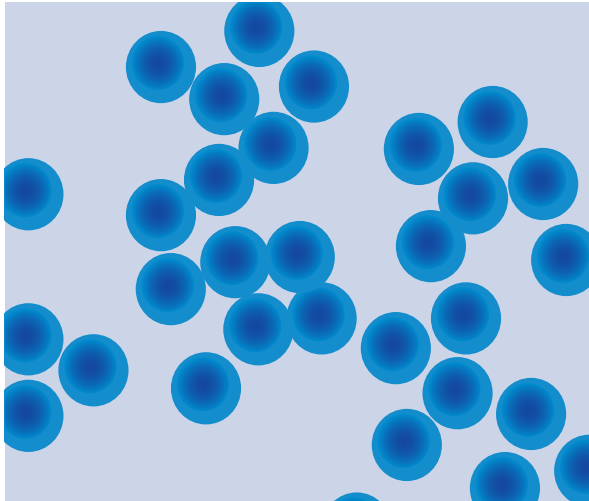

Figure 1: Blue SalColors™ microbeads suspended in a clear wash.

Rubbing breaks down beads without leaving residue. Available in various colors.

Average diameter: 600-800 microns

SalColorFx™ (SCFX)

Visible beads that provide color-change effect upon rubbing. Use in various skin and hair care products to convey an immediate change such as whitening, tanning, blemish reduction, etc.

Average diameter: 300 microns

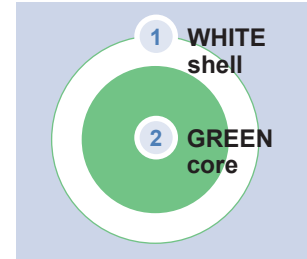

Figure 2: Diagram of SCFX W2G.

Figure 3: Facial mask with White to Green SalColorsFx™ technology showing pre-color change (A) and post-color change (B).
